

BHAVEYDEEP SINGH SETHI

Information Technology | Software Development | Data Analytics

PROFILE SUMMARY

Aspiring Data Analyst with a strong foundational background in software development and database management. Proficient in writing efficient SQL queries, structuring relational databases, and creating data visualizations to uncover trends. Adept at applying software engineering principles to clean and manipulate data, seeking to leverage these technical skills in an entry-level data analytics role.

EDUCATION

2023 - 2025

UNIVERSITY OF FRASER VALLEY

- Bachelors of Computer Information Science

2025 - 2027

YORK UNIVERSITY

- B.A., Hons. Information Technology
-

LANGUAGES

- English: Fluent
 - Hindi: Fluent
 - French: Basics
-

TECHNICAL EXPERIENCE

Data Analytics & Relational Database Project | 01/2026 - 05/2026

York University

- Engineered relational databases by mapping schemas, building ERDs and enforcing primary/foreign key constraints
- Wrote optimised SQL queries and subqueries to extract insights from complex multi-table datasets
- Cleaned and transformed data to handle missing values, format data types and eliminate duplicates
- Designed visual dashboards to translate technical database query outputs into clear actionable charts

Systems Administration | 07/2024 - 12/2024

York University

- Gained experience with Windows & Ubuntu Server, and their system configuration and client-server communication
- Configured Windows Server to interact with client machines and manage users and resources
- Performed basic administration on Ubuntu Server, including navigation and configuration
- Built a foundation in server management, operating systems, and networked system interactions

CLOUDSUFIT Internship | 06/2025 - 09/2025

Team Member (Project Collaboration)

- Collaborated remotely on a web project for influencers with US-based cloud computing company.
 - Gained exposure to cloud platforms, cybersecurity and compliance standards.
 - Maintained accuracy, and attention to detail while testing, documenting and quality assurance.
 - Developed time management and teamwork skills in a fast-paced, deadline-driven environment.
-

PROGRAMMING PROJECTS

To-Do List Application (Java)

- Developed a task management application using Java to create, update and delete tasks.
- Implemented object oriented programming concepts to manage task data and application logic.
- Designed a simple interface and structured code to improve usability and maintainability
- Tested and debugged the application to ensure the reliable performance, hosting on local host

Inventory Management System (Java)

- Built a Java-based inventory system to manage product records and track stock quantities.
- Implemented CRUD features for adding, updating and removing inventory items within the system.
- Used structured programming and data organization to maintain accurate product information
- Tested the system using XML file to insert the data records for data handling.

TECHNICAL SKILLS

Programming & Web Development: Java, JavaScript, HTML, CSS, C++

Technology Awareness: Software Testing, Cybersecurity, Remote collaboration, regulatory compliance.

Database: Data entry, Basic SQL, Debugging, document management, scheduling, project tracking.

Learning: Actively developing proficiency in Machine Learning; quick learner with strong technology adoption capabilities.

CERTIFICATIONS & COURSES

Google Data Analytics Professional Certificate

- Data analysis fundamentals
- SQL Basics
- Worked on Google cloud SQL model
- Data cleaning & visualization

IBM AI Developer

- Currently undergoing course catered towards Generative AI
 - Introduction to Software Engineering
 - Developing AI applications with Python and Flask
-
